

Turning on the LED

Hold the loupe and rotate the focus knob in counter-clockwise direction to open the battery compartment.

Pull the plastic film from the button batteries in the battery compartment to remove it.

Hold the loupe and close it by rotating the focus knob in a clockwise direction.

Turn on/off the LED by simply switching it on or off.

Changing the Batteries

1 First, Open the battery compartment. Use the small metal tool (hook) that is included in the set to easily remove the old AG9 button batteries

2 Insert four new AG9 button batteries in the battery compartment. Make sure to insert the batteries in correct polarity position. Close the loupe after.

Changing the Scale

1 This meter has a detachable reticle glass scale, if you want to remove and change it just simply rotate the detachable scale on the meter.
